

One-Day Quality Assurance Assessments for Wood Products Manufacturers

- Are you ready to improve your level of manufacturing quality?
- Is your process creating a lot of rework and scrap?
- Are quality issues reaching your customers?
- Are you having trouble training and keeping employees?

A quality assurance system could be a good fit for your organization.

One-day quality assessments are currently available to Wood Products Manufacturers at no cost. This involves a detailed evaluation of your manufacturing process and front end activities including:

- Machine Maintenance
- Management Commitment and Leadership
- Order Entry, Scheduling and Product Planning
- Incoming Control of Raw Material
- Quality Standards and Procedure Development
- Skills, Training and Career Development
- Product Traceability and Plant Layout
- Control of Scrap, Waste, Rework
- Customer Service and Warranty
